FORMULACION DE LA ESTRATEGIA DE BUSQUEDA

TIPS para realizar búsquedas en las bases de datos:

- Utiliza frases o palabras entre comillas (“ ”), esto obliga a las bases de datos a buscar los términos juntos.
- Explore en las bases de datos la opción : “**Búsqueda Avanzada**” ó “**Búsqueda Experta** .” Encontrará mejores resultados y enfocará de mejor forma su búsqueda .

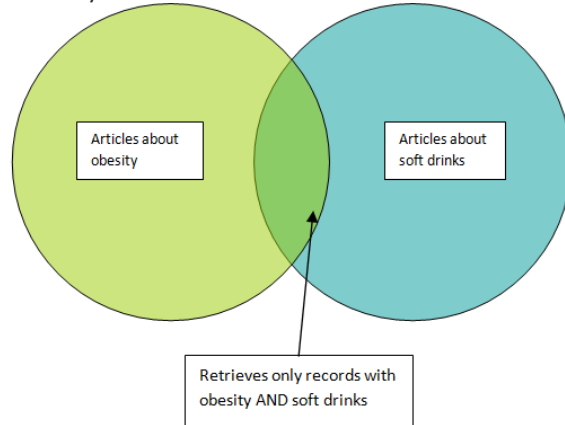

USA LOS OPERADORES BOOLEANOS

El operador **AND** :

- Usa este operador para conectar diferentes conceptos
- Requiere que **todos** los términos de búsquedas aparezcan para su recuperación .
- Limita la búsqueda, mientras más conceptos con **AND** estén juntos, los resultados de búsqueda son menores.

Example:

obesity **AND** soft drinks

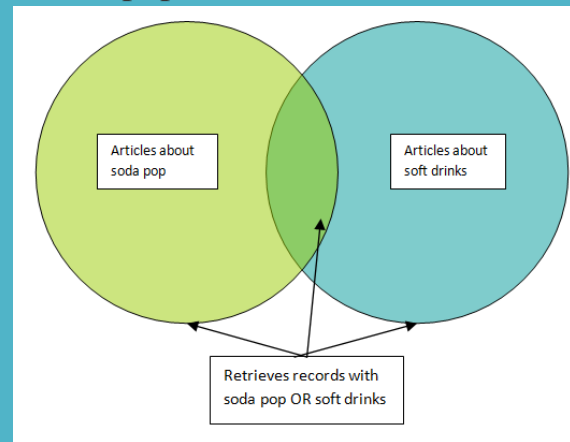

El operador **OR** :

- Usa este operador para sinónimos o términos relacionados
- Instruye a la base de datos a recuperar todos los términos
- Expande los resultados de tu búsqueda . mientras más términos con **OR** estén juntos, los resultados de búsqueda serán mayores.

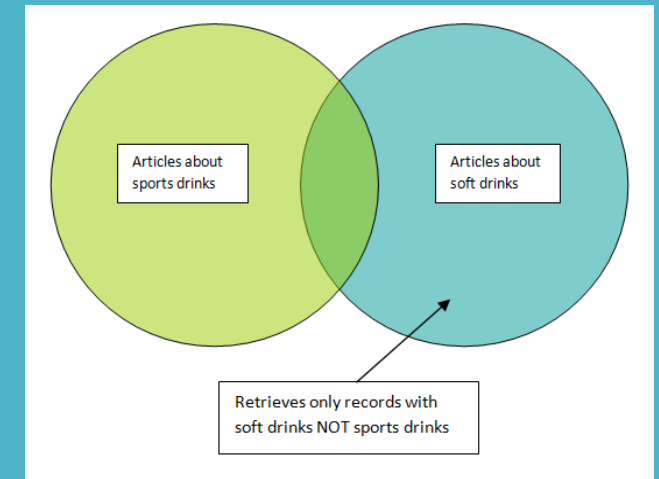

Ejemplo:

soda pop **OR** soft drinks

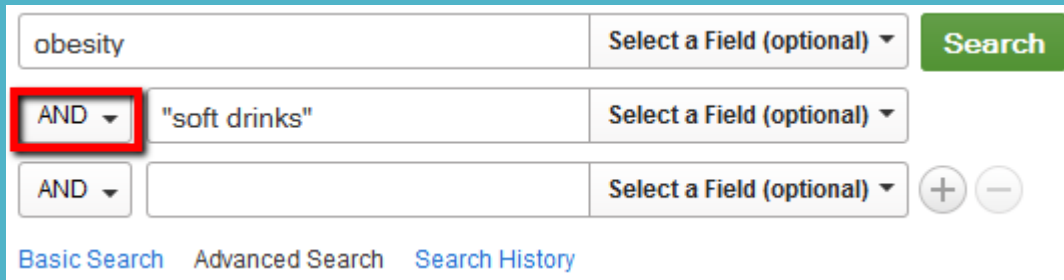

El operador **NOT**:

- Excluye los resultados de búsqueda o los reduce
- Ejemplo:
soft drinks **NOT** sports drinks

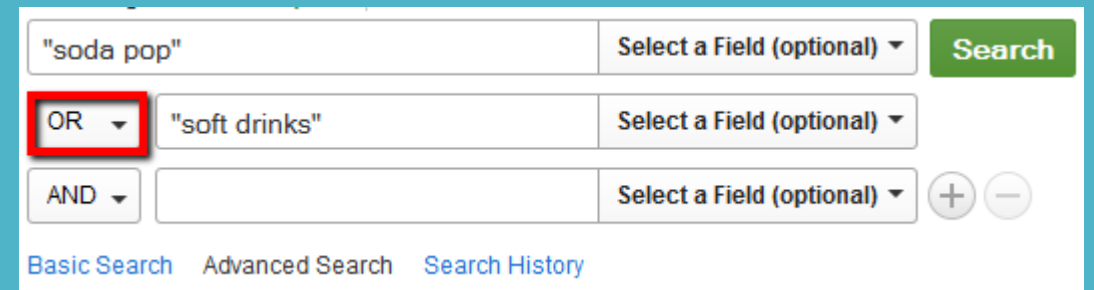

Cómo usar los operadores lógicos booleanos en tu búsqueda?

- **AND** - Se usa para **combinar** los conceptos.
- Escribe **un concepto** por cada caja de búsqueda.
- Usa **AND** entre las cajas de búsqueda . La base de datos encontrará artículos que cubran los dos conceptos juntos.

A screenshot of a search interface. The first search box contains the word "obesity" and has a dropdown menu set to "Select a Field (optional)". The second search box contains the phrase "soft drinks" and also has a dropdown menu set to "Select a Field (optional)". A red box highlights the "AND" operator in a dropdown menu between the two search boxes. Below the search boxes are buttons for "Basic Search", "Advanced Search", and "Search History".

- **OR** - se usa con sinónimos o palabras relacionadas.
- Escribe **un concepto** por cada caja de búsqueda.
- Usa **OR** entre las cajas de búsqueda. La base de datos encontrará artículos que cubran cualquiera de las palabras claves.

A screenshot of a search interface. The first search box contains the phrase "soda pop" and has a dropdown menu set to "Select a Field (optional)". The second search box contains the phrase "soft drinks" and also has a dropdown menu set to "Select a Field (optional)". A red box highlights the "OR" operator in a dropdown menu between the two search boxes. Below the search boxes are buttons for "Basic Search", "Advanced Search", and "Search History".

- Para encontrar más artículos pruebe con **sinónimos** combinados con “**OR**” (en mayúscula). Por ejemplo: "children OR juvenile OR youth“, encontrarás más artículos que simplemente: "children."
- Use **asterisco (*)** para buscar variaciones de una palabra **raíz**. Por ejemplo: child* encontrará artículos con la palabra child, children, or childhood. Esta búsqueda de “truncamiento” generalmente encuentra más artículos.
- Para encontrar **menos artículos**, use “**limitadores.**” La mayoría de las bases de datos le permiten marcar opciones para artículos revisados por pares, la fecha de publicación y el idioma.

Según el género (hombre o mujer) se ejercen diferentes estilos de liderazgo. Por un lado, las mujeres han sido catalogadas más transformacionales que los hombres, que se consideran, por el contrario, más transaccionales. En este sentido, este estudio identifica el estilo de liderazgo promovido según el género de los gerentes en las pymes de Cali del sector manufacturero y de alta tecnología. Para este fin, se aplicó el cuestionario multifactorial de liderazgo (MLQ) a una muestra probabilística de 142 gerentes. Los resultados muestran que el estilo predominante en las pymes es el transformacional, tanto en hombres como en mujeres, es decir, que no difieren en su estilo de liderazgo de manera significativa. Esta investigación contribuye a un nuevo contexto según el cual el estilo de liderazgo no varía de acuerdo con el género y plantea la idea de que hombres y mujeres pueden dirigir de manera similar.

Alternate abstract:

Different leadership styles are exercised according to the gender (male or female). On the one hand, women have been regarded as more transformational

Alternate abstract:
Different leadership styles are exercised according to the gender (male or female). On the one hand, women have been regarded as more transformational leadership style, while men have been regarded as more autocratic leadership style. A quantitative study was conducted on a probabilistic sample of 142 managers in the manufacturing sector of Cali. The results indicate that, as in women, that is, that they do not differ in their leadership style, the leadership style does not vary according to gender and role.
